### Exquisite Corner 7-Room on the River

A wonderful fully restored and renovated home with classic proportions. A large living room with wonderful southern light, perfect for entertaining and complete with a decorative fireplace. An oversized traditional dining room perfectly suited for entertaining or intimate family dinners and is renovated beautifully. This room is also used as a den/family room with suitable custom built-ins that have space for a television, china and displays. Directly off the foyer and dining room is the eat-in kitchen with pass through from cooking to the eat-in area. Behind the kitchen is a generous maid's room complete with full bathroom. The bedrooms are off a separate wing off the central foyer. Each bedroom is oversized and has oversized windows, tree or park views and exceptional light. A superb additional feature is the tremendous amount of storage in the apartment due to the very large and well-outfitted closets as well as customized built-ins in almost every room.
